

Kyla Gen 2 Smart Hub

KHUB-210-ZB

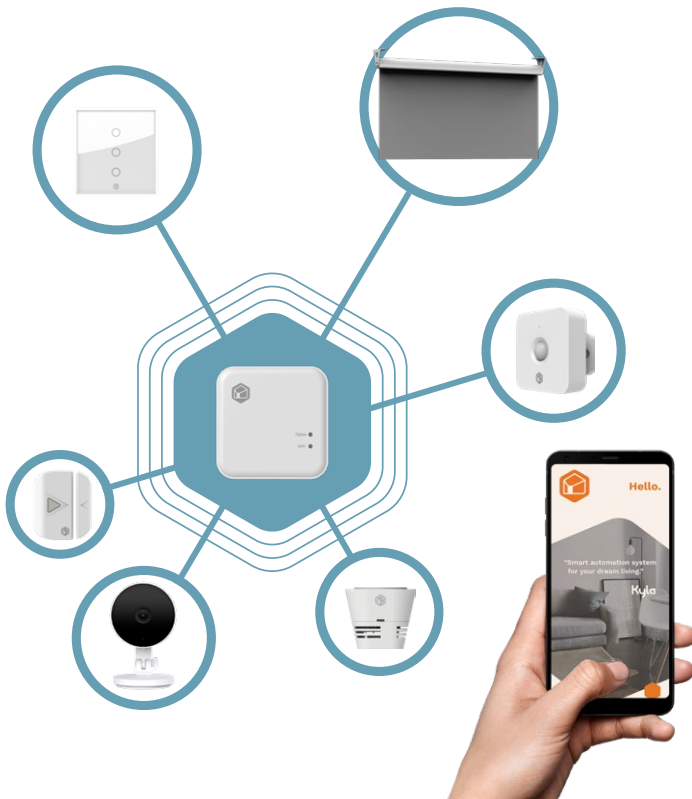

Overview

The Smart Hub bridges the user's smartphone with their Kyla Zigbee appliances, allowing them to easily communicate information seamlessly in real time. This is achieved with the Kyla Smart Hub's distinctive feature of being equipped with Wi-Fi, which means that setting up can be done wirelessly, without the need for a LAN cable. This provides the user with the freedom to place it anywhere in the household for optimal coverage.

Features

- Small and Compact – Easily integrates with any home interior design
- Easy Pairing – Intelligent searches for Kyla Zigbee devices and network automatically
- WiFi Connectivity – Eliminates the need for a LAN cable, allowing user to place it anywhere in the house
