

# Kyla Gen 2 Smart Station

KSMT-110-WF

## Overview

The Kyla Smart Station is a powerful IR blaster for all Infrared (IR) appliances in your home. Compatible with over 1,000 brands of IR appliances, you can control all your connected appliances such as air conditioner, TVs and air humidifiers from anywhere through the Kyla app.

The Kyla Smart Station also packs intelligent sensors to measure the surrounding comfort level. It monitors home temperature, humidity values and air quality and provides real time status via the Kyla app. An all rounded efficient device that can be integrated with other IR appliances to ensure that your home living environment is always kept at optimal conditions.

## Features

- Universal Remote – Controls all your IR appliances through the Kyla app, such as turning it on/off and setting temperatures and volumes.
- Real Time Monitoring – To get the most updated data on air quality, temperature and humidity values on the app
- LED Indicators – LED indicators to notify status of air quality, temperature and humidity values
- Easy Set Up – Connect the Smart Station to a power point and pair with your smartphone via the Kyla app
- No Hub Required – Connects directly to existing Wi-Fi network without the need for Hub
- Remotely Control – Control, automate, and schedule via Kyla app on smartphone
- Scene Control – Set up automation with other IR appliances such as air purifier or air conditioner to turn on when conditions are met
- Voice Control – Compatible with Google Assistant and Amazon Alexa for voice control command
